HORI SHINJIRO

(54) DATA TRANSFER DEVICE, ITS CONTROLLING METHOD AND PRINTING SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a data transfer device, its controlling method and a printing system capable of attaining bus control of high convenience by judging the permission/refusal of data transfer and informing a host of the judged result.

SOLUTION: When a data transfer request is outputted from a host (701), a printer side judges whether data can be received or not (702), and when data reception is possible, outputs reception possible information to the host (704). Thereby the host transfers data (705) and the printer receives the transferred data (706). When reception is impossible, the host is informed of the judged result (708). The host receiving the reception impossible information intermittently continues the issue of the data transfer request.

LEGAL STATUS

[Date of request for examination]
[Date of sending the examiner's decision of rejection]
[Kind of final disposal of application other than the
examiner's decision of rejection or application converted
registration]
[Date of final disposal for application]
[Patent number]
[Date of registration]
[Number of appeal against examiner's decision of
rejection]
[Date of requesting appeal against examiner's decision of
rejection]
[Date of extinction of right]
